

Eurotech TriTone Sounder

With a low profile sleek design, the Identifire Tritone sounder is ideal for standard installations and where aesthetics are an important consideration.

Suitable for conventional sounder circuits, notification alarm circuits and 2-Wire alarm systems. TriTone's low operating current means it can easily be interfaced onto Analogue Addressable fire alarm systems with a suitable output module.

The Tritone sounder can be flush mounted using a standard electrical single gang back box and surface mounted with the Identifire back box.

In common with all other Identifire products, our TriTone Sounder Unit can be customised with your choice of logo and text in any language*

FLUSH MOUNTED

SURFACE MOUNTED

FEATURES

- Aesthetically appealing design
- Sounder approved by UL to EN54 Part 3
- Low Current Consumption, 6 mA
- Selectable Output, High: 92-96 dB(A) / Low: 86- 90 dB(A)

SPECIFICATION

Operating Voltage	20- 28 VdC
Current Consumption	6 mA @ 24 VdC
Weight	0.06 kg
Operating Temperature	-5 to +50 C
Material	Fire Rated ABS
