

Product Obsolescence Notice

EVAC-RES-ISO — Dual Residential Isolator Module

Status	Effective Date	Document Ref
Withdrawn from Sale	1 May 2026	EFS-OBS-2026-001

01

Obsolescence Summary

Product Name	Dual Residential Isolator Module
Part Number	EVAC-RES-ISO
Product Status	Obsolete — Superseded
Effective Date	1 May 2026
Last Order Date	30 April 2026
Issued By	Eurotech Fire Systems Ltd

02

Reason for Obsolescence

The EVAC-RES-ISO Dual Residential Isolator Module is being withdrawn from sale following a structured review of customer feedback received across the Euro-VAC product range. Customers consistently highlighted a need for greater installation flexibility, introducing a smaller enclosure size, which incorporates our DIN-mounted solution.

In response, the product has been superseded by two purpose-built replacements that retain full functional equivalence while addressing the specific installation and specification requirements raised by customers.

The replacement range introduces two mounting configurations — a self-contained boxed assembly with integrated DIN rail, or an open DIN mount suitable for installation within a bespoke enclosure to suit individual project requirements.

03

Replacement Products

The following replacement part numbers are available with immediate effect. Please contact your Eurotech account manager or authorised distributor to place orders.

PART NUMBER	DESCRIPTION
EVAC-RES-ISO-BOX	Dual Residential Isolator – DIN Mount (Boxed)
EVAC-RES-ISO-DIN	Dual Residential Isolator – DIN Mount (Unboxed)

The EVAC-RES-ISO-BOX features a significantly reduced enclosure size compared to its predecessor, delivering a streamlined packaging footprint and reduced plastic wastage.

The replacement products are technically identical to the EVAC-RES-ISO, ensuring full functional equivalence and the same level of compliance is maintained.

04

What This Means for You

Existing Orders	Any outstanding orders referencing EVAC-RES-ISO will be fulfilled subject to available stock. Please contact your account manager to discuss your requirements.
Live Projects	For existing projects specifying EVAC-RES-ISO, Eurotech will continue to supply the obsolete product to ensure project continuity. Our technical team is available to advise on the appropriate replacement product should you wish to transition, and to assist with any compatibility queries.
Specifications	We recommend updating any project specifications, tender documents, or technical submittals to reference the relevant replacement part number at your earliest convenience.

05

Existing Stock & Availability

Existing EVAC-RES-ISO stock held by Eurotech and authorised distributors may continue to be available until depleted. No new manufacturing runs will be initiated. We recommend transitioning to the replacement products at the earliest opportunity to ensure continued availability.
